A PHILOSOPHIC PEDDLER,-BY G. ELLINGTON.

WEDNESDAY, JANUARY 7, 1880. The Street Workers of New York.

It was on my way to Saratoga, by way of beat, in the latter part of the month of Sep-tember, that I met the subject of this sketch. The "season" at the great watering-place was over, and there were very few travelers. After supper, toward nine o'clock in the evening, I took a tancy to wander round the lower deck to take a look at the machinery and listen to the playing of a not very tuneful harp. Going forward, amidst a mare of merharp. Going forward, amidst a mane of mer-chandlise of every description, I found myself among the "steerage" or "dock" passen-gers, who, for a vary way "for the description of the d

"Yes, srr, I'm a peddler-I might say, srr, that the pressure of the mass of water would a part in jumping, seven of the strings were broken in ascending and seven in descending. I'm a Jew, perhaps, because you find most causes, and might cause them to fail, and thus nected with the camera that as one parted a peddlers who come to your house to be Jews.

entail the loss of hundreds of thousands of mogative was produced. Other pictures were palm trees. It is now probable that this project will be abandoned, and a railway from the various movements of horizontal programment. n England; my mother was a Jewess, my ather was an Englishman; and, as you see, I I should ope not. My father were a tradesman in the old country. He kept a kind of a notion store, where you could buy most anything and heverything. We were not by any les would reap the benefit of this cultivation means well-to-do. It's a poor country to rise in, as you know, sir. You've got to be born made from Affreville to Laghonat, where the risen. We all had to work, my mother and my brother (who got tired of the 'ole thing and ran hoff to Haustralia, and we never than is now met with on the Algerian railheerd from him since), and I ran of errands, and carried bundles, and made myself, as the sayin' goes, 'generally useful.' My father 220 miles from Laghouat, where a dry valley, was not a college-bred man, but he was a great reader. He read hanything and heverything all the time he could spare; and, between me and you, sir, he were much better time were believed to occupy its whole length fitted to keep a book-stall than a notion-store, and breadth cover, it is now known, only the of which he didn't 'ave much notion, anyhow. He was a quiet man, wrapped hup in 'is own thoughts, though very gentle and kind and good to all about 'im. He taught me to read, occasionally swept away by the violent winds

"Wells my father died, and that brought day will have to traverse the desert, is what about terrible changes. My mother took-on puzzles the minds of those who are planning awful, for, you see, she used to look up to this railway; but they expect to overcome him—he bein' a bookish man, and she having this by placing on the various trains tanks sufficiently large to contain all the water rethere I was, at twenty years of age, left alone, and originality in design, if nothing more, for, strange to say, I adn't hanother relative in the world except my brother, and I didn't know where he was. I came to this country thinkin', and rightly, it was the place to make morey for a man with small means (I had about \$1,000). I went West. I opened a notion store in a little city, and I staid there for fifteen years. I 'ad no vices to speak of, I saved my money, and at the end of that time I was worth a matter of \$8,000.

"Well, sir, I think you'll bear me hout in one hassertion, and that is, that the Jews, as a class, are not a speculative race; they make their money by 'ard work and savin' what they make. But remember I'm not a fulllation growing upon me. I saw people investin' in this, and investin' in that, and doub-ling, and trebling their money, and why shouldn't I? As I always kept my mouth pretty close, no one knew what I was worth, or, indeed, that I was worth anything, for my store was a very small affair. But so soon as I signified a desire to invest I had hoffers from all quarters, and for all sorts of heaterprises. To make a long story short, I put my \$8,000 into a mining affair which hutterly failed, and I, with a lot more of poor fellows. lost all. Then wasn't I discouraged! I followed my mother's hexample, and gave way to drink for a time, but I 'ad some of my father's sense, and I soon saw that wasn't the thing, and I stopped—clean short hoff. I al-ways liked to travel, so I sold out my store and took to peddling in the notion and cheap dress goods line.

"I went farther out West, goin' as far as California, though I didn't walk, of course, over the plains. I have been in nearly every State in the West and South and all the Eastern States several times over."
"And now?" I interrupted,

"I am on my way to the north-western corner of the State. "In the notion line yet?" "Oh, no, sir. I've something that catches the people better."

He displayed to me his basket. It was filled with that gittering kind of cheap jewelry sold by the many street vendors on Broadway, Eigth avenue and the Bowery. "Yes, sir," he continued, looking with an

admiring eye at the showy mass, "that's what takes 'em now-a-days, especially the wim-men. Is the profits large? Well, let me

appy, but now I am. I don't bother about Schools, streets and theaters will be ope the boxes here, and thinkin' it can't be very facts, adds that the project will so fortable as you in your state-room to-night. Europe
My 'elth, thank Heaven, is good. Of course I
walk a great deal; I eat good; I sleep good;
Silk I 'ave no desire for fine clothes. With a book and a pipe I can be content. I don't drink at

It was Emerson's "Conduct of Life," and it is Emerson himself who somewhere says that if, traveling on some far Western train,

"I picked it hup," he continued, "at a book-stall in Nassau street. Yes, I rand all I can, mostly solid books. I take after my father in that respect. When traveling I stop at cheap country hotels. In the city I get a small 'all bedroom. Winter hevenings I stay at one and read, or go to the theatre when

ourney to Albany, and are allowed to sleep on return it to its supposed original condition of about equally divided between German and ort of Sahara into an inland sea might not, af-Irish, and they were almost all asleep. Turning to come back, my attention was arrested nent of Africa as was claimed when the proby a man who was evidently one of the deck passeragets, but removed at some distance from them. He was scated on a box near one of the lights and reading a book. He asked me the time, and that led to quite a lengthy conversation between ns, which, leaving out the caravans from Tunis and Algiers to the inny questions and much that is irrelevant, let me epitomize thus:

he men beck, my decken, in order to operate the mechanism for exposing the sensitive plate at the proper instant. From the caravans from Tunis and Algiers to the interior would be as arid as those of the Mediterranean in Tripoli, and if the climate should change, the date crop, which is the principal support of the natives, would be converted to the mechanism for exposing the sensitive plate at the proper instant. From the caravans from Tunis and Algiers to the interior would as a rid as those of the Mediterranean in Tripoli, and if the climate should change, the date crop, which is the principal support of the natives, would be converted to the mechanism for exposing the sensitive plate at the proper instant. From the caravans from Tunis and Algiers to the interior would as a rid as those of the Mediterranean in Tripoli, and if the climate should change, the date crop, which is the principal support of the natives, would be captured to prove the mechanism for exposing the sensitive plate at the proper instant. From the camera to a point beyond the jump was made the strings were only a few inches above the ground, and from them to the aper in the proper instant. no one knows where to-morrow. You think rents which feed the artesian wells in the The strings were tautly drawn, and so con Algeria to the mouth of the Senegal River have what a 'unicrous friend o' mine calls, constructed. The distance from Algiers to 'an 'Ebraic cast o' beauty,' and, as you 'ave | Timbuctoo is about 1,600 miles, and the cost minth part of its territory. These sandy hills which I learned to do quite quick, and I would ave been as great a reader as he if I had had the chance, but I didn't.

tunnels could be built so as to protect the road. The supply of water for the use of the engines especially, as at least three trains per I'im as a sooperior creature. But aside quired during twenty-four hours. A railway om that he was a very good and a very lova." across Sahara, and a tunnel through the Isth the man. She took to drinkin too much to mus of Panama, certainly ought to gain for brown her sorrer, and in a year she died. So, French engineers a reputation for boldness

The New Eddystone Lighthouse.

The foundation stone of the new Eddystone Lighthouse was laid August 19, by the Duke of Edinburgh. The Eddystone rocks are situated in the Euglish channel, 14 miles southwest of the port of Plymouth and 125 from Rame Head. So exposed are they to the ocean swell from the south and west that in even comparatively calm weather the waves go raging and thundering over their ledges, and their name indicates the incessant swirl of the deep about them. Most of the worl thus far has had to be done under water, and blooded Jew-people must take me as the Englishman does his hale—'alf and 'alf. So, you see, when I got so much money saved up, Englishman does his hale—air and air. So you see, when I got so much money saved up, through I'd been thrifty and saving all the when the construction will proceed more when the construction will proceed more rapidly, as the courses of stones are all accurately fitted together on shore. Probably i will take five years to complete the lighthouse which is to follow generally the lines of the present one, though it will differ from it slightly in form and considerably in size. To a height of 25% feet above high water mark the tower will be solid, with the exception of a space for a water tank. The side walls beginning at this level will be 814 feet thick, diminishing to 214 feet at the top. Nothing but granite will be used, and the blocks will be large enough to form the entire thickness of the hollow portion of the tower. Under the cornice, whose top is 138 feet from the rock, the diameter of the tower will be 1814 feet; it will contain nine rooms, besides the lantern being 10 feet high and the seven uppermost ones 14 feet in diameter. The focal plane of the new lighthouse will be 130 feet above high water, as compared with 72 feet in the present building, and the actual useful range of the light will thus be extended from 14 to 174 niles. About 5,100 tons of granite will be employed in the construction, and 50 tons of iron for door casings and the like. The fogbell, erected in 1872, will be replaced by powerful siren and the electric light probably be used. The estimated cost of the entire work is between \$300,000 and \$350,000.

Roman Public Works.

During the past few years the improvements in the streets and buildings of ancient Bone have been very great. New arrange-ments have recently been made for other important changes, toward which the State will contribute the sum of 49,000,000 francs. A show you. These imitation diamond stud-cost a cent and a half a piece; they retail for museums three millions, while seven millions twenty-five cents. These jet crosses are a are assigned for a "Policlinico," and barracks cent and a half a piece; they retail for twenty-five cents. Ladies' and gentlemen's sets, dia-two regiments of cavalry and artillery, at a mond-imitation of course-breastpins and total cost of four millions. Among other inger-rings cost all the way from \$1 to \$4 a reports is one that the vast Capuchin Convent, gross, and sell for from twenty-five to fifty near the famous Capuchin Cemetery, in the ents each. In the South, among the negroes, Piazza Barberini, will be converted into a I 'ave hoften and hoften got a dollar for a set military hospital. Then it is said that the that didn't cost me hover four cents. And ancient Fiaminian Way, lately ruined for factory girls down East will sooner 'ave jew- pedestrians by the street-cars, will be widenels than food, though some of 'em are pretty smart and you can't fool 'em very easy.

"My mode of life? Oh, sir, it's quite simple. You see hambition is the bane hof man-and a half. The work on the Tiber embankknow, bespecially hin this country. As long as you're hambelious you can't be 'appy, buse will be removed to make way for it.

That's my doctrine. When I was workin' and tryin' to make so much I wasn't which shall be given exhibitions of the arts. the future. I makes a good livin' in a pleas-ant way and it suits me. You're looking at the "Globe" of London, who gives these 'pleasant.' Well, it's all in custom. Lay an on old blanket down 'ere, and I'll be as com- will be one of the most magnificent capitals in
